Good Morning Eric –

Hope All is Well!

Next step, we just need to know now when you would like for us to post the redacted Risk Assessment for your docket EPA-HQ-OPP-2019-0274. We would change the status from “do not post” to “Draft” and then the docket would continue the docket process until the Risk Assessment is posted on regulations.gov on the selected day for posting.

Earl can let you know if he needs anything else from you to continue the CBI substantiation process for the sections claimed CBI by the registrant.

Sharon

Earl and Sharon,

This document looks good and I have replaced the original version with this one in the docket. I'm not sure what the next step for it to go live is, but let me know if we need to do anything on our end.

Also, we would like to continue with the CBI substantiation process for the CBI claims made. Please let me know if there is anything we need to do to continue that process as well.

Thanks.

Eric,

Please take a look this redacted copy. If you agree it covers all of Oxitec's markings, please load in FDMS and replace it for the original copy if it is loaded.

You can removed "Redacted" from the file name if you like.

Let me know if you have any questions.

Good morning Eric,

I hope that you are well.

As we discussed yesterday, attached is version of the OX5034 EUP Human Health and Ecological Risk Assessment with Oxitec CBI identified as highlighted text.

The document is password protected, and I will send an email with the password separately.

Please do not hesitate to email or call, if you have any questions.

Best,

Keith
